OG Suppressors Unveils Advanced Suppressor Lineup Featuring 2025 Thunderbeast Champion Scorpius .22LR

Shevlin, MN — January 2026 — *OG Suppressors* today announces its complete lineup of precision-engineered firearm suppressors, delivering unmatched performance, lightweight handling, and proven quiet operation across rimfire and centerfire platforms. The portfolio includes the industry-recognized Scorpius .22LR, the Operator series for 5.56, and the versatile Trident series for .30-caliber applications.

At the forefront of the lineup, the **Scorpius .22LR** has been officially named the **2025 Thunderbeast Champion**, earning the top overall ranking for sound suppression in the .22 Long Rifle category at the prestigious **TBAC Sound Summit**, underscoring its exceptional acoustic performance and industry leadership.

Suppression Solutions for Every Shooter

OG Suppressors' product line reflects a commitment to cutting-edge materials, additive-manufacturing precision, and real-world performance:

Scorpius .22LR — Ultra-lightweight rimfire suppressor (.22 LR)

- Precision suppression in an ultra-compact 1.95 oz class design.
- Ideal for rimfire pistols and rifles, blending minimal weight with optimized quiet performance.
- *Named 2025 Thunderbeast Champion* for best .22LR suppression.

Operator TI — 5.56-specific lightweight suppressor

- Purpose-built direct-thread design optimized for 5.56 platforms.
- Combines accuracy-centric performance with durability and weight savings.

Operator Inconel — 5.56-specific rugged suppressor

- Constructed from robust Inconel materials for extended durability.
- Engineered for sustained use where heat and wear resistance are critical.
- **Operator Inconel is one of the few suppressors to PASS the U.S. SOCOM tests**

Trident TI — .30-caliber ultra-lightweight suppressor

- Designed for .30 caliber rifles where weight, balance, and stealth matter.
- Titanium build minimizes load-carry weight without sacrificing sound reduction.

OFF GRID SUPPRESSORS

Engineered for Performance, Built for the Field

Each suppressor in the OG line benefits from precision additive manufacturing and premium materials, yielding products that excel in sound reduction, handling, and durability. With configurations optimized for specific calibers and operational uses, OG Suppressors meets the diverse needs of hunters, sport shooters, and professional operators alike.

“The recognition of the Scorpius .22LR as the **Thunderbeast Champion** validates our design philosophy — where innovation meets measurable performance,” said a spokesperson for OG Suppressors. “Across the lineup, our suppressors deliver the quietness, balance, and reliability today’s shooters demand.”

Availability: OG Suppressors products are available now through authorized dealers nationwide.
